Antenna Farm

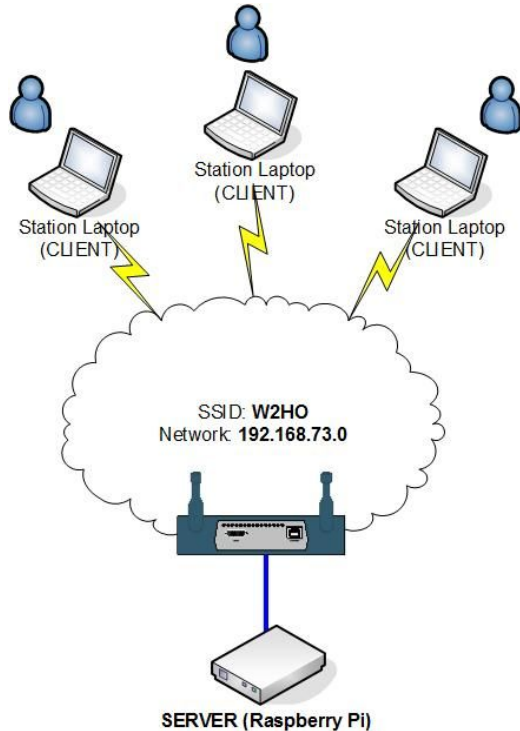

● Beams (on tower)
6m 2 Element

— Wire Antennas
80-10 Meters
Dipoles, OCF(?)

● Loaded Verticals
40-10 Meters

Field Day Logging Network

Name: **W2HO**
IP Address: **192.168.73.100**

No Internet access

Only laptops with Windows 7 or 10 with RAM minimums of 2GB and 4GB respectively supported

Laptops should have been fully updated/patched prior to being brought on-site. This includes latest [N3FJP ARRL Field Day Contest Log software](#) installed. Club has a license for W2HO.

While there should be no power interruptions to the Raspberry Pi Server and Linksys Router, the Pi is fault-tolerant (no data loss.)

In case of outage wait three minutes for restart and then reconnect to WiFi and network share PRIOR to re-starting N3FJP software on laptops
